Welcome to INHN by Thomas A. Ban, Barry Blackwell, Samuel Gershon, Peter R. Martin & Gregers Wegener (May 23, 2013)

Contact:

Website address: inhn.org ; E-mail address: inhn.org@gmail.com

Mailing address: Translational Neuropsychiatry Unit

(Prof. Gregers Wegener)

Department of Clinical Medicine

Aarhus University

Skovagervej 2, 8240 Risskov, DENMARK:

About INHN:

Objectives:

The Network, through its members, is committed to documenting, preserving and disseminating all contributions relevant to the history of neuropsychopharmacology. It will also analyze material relevant to contemporary research, education and mental health care to generate new information and educational material related to the history of the field. The *raison d'être* of the Network is to facilitate communication between neuropsychopharmacologists of different generations and professional backgrounds, and thereby provide a more solid foundation for future development of the field.

Membership:

By invitation. List of members in alphabetical order with country of current residence.

Operating committee:

Thomas A. Ban, Barry Blackwell, Samuel Gershon, Peter R. Martin &
Gregers Wegener

Central coordination:

Network coordination - Thomas A. Ban; Website coordination - Gregers Wegener; Projects coordination - Peter R. Martin.

Projects & projects coordination:**One:**

Historical dictionary of neuropsychopharmacology (Dictionary): Thomas A. Ban
(tomban@bell.net)

Two:

Historical drug inventory of psychotropic drugs (Drugs): Eric Konofal (konofal@me.com)

Three:

Photo history of neuropsychopharmacology (Photos): Carlos Morra
(carlosmorra@hotmail.com)

Four:

Profiles of distinguished neuropsychopharmacologists (Profiles): Carlos Morra
(arlosmorra@hotmail.com)

Five:

Controversies in the history of neuropsychopharmacology (Controversies): Antonio E. Nardi
(antonioenardi@gmail.com)

Six:

Textbook on the history of neuropsychopharmacology (Textbook): Aitor Castillo
(sicagenda@hotmail.com)

Seven:

Discoveries in neuropsychopharmacology that have not been followed up and experiments that could not be replicated (Discoveries): George Gardos (pgardos@comcast.net)

Eight:

Information on books in neuropsychopharmacology: classic & current (Books): Carlos Morra (carlosmorra@hotmail.com)

Nine:

Biographies, autobiographies and selected writings of neuropsychopharmacologists (Biographies): Barry Blackwell (blackwellbarry@hotmail.com)

Ten:

Historical perspective in neuropsychopharmacology: information from and comments on current publications (Perspective): Samuel Gershon (samuelgershon258@gmail.com)

Eleven:

Electronic archives in neuropsychopharmacology (Archives): Gregers Wegener (wegener@dadlnet.dk)

Twelve:

Educational E-Books in neuropsychopharmacology (E-Books): Peter R. Martin (peter.martin@vanderbilt.edu)

Copyright policy:

INHN will not request, require or hold any rights about any of the material published (posted) on this website; authors publishing (posting) material in any form on this website clearly will retain the sole ownership of their property.

Where to submit for website posting:

Members of INHN, who wish to submit original material for any of the 12 projects or to make comments on existing postings, should e-mail them to the appropriate project coordinator as an attachment using format as specified (see Appendix).

How to cite website postings:

Postings on INHN's website are referenced as follows: Name (surname and initials) + full title of posting + identification of website + identification of project + date of posting. Example: Konofal E. Methylphenidate. inhn.org; Drug Inventory. September 12, 2013.

Project One (Dictionary – Thomas A. Ban). Historical Dictionary in Neuropsychopharmacology

A comprehensive vocabulary of terms/words used in the different areas of research in neuropsychopharmacology and in education and clinical practice with psychotropic drugs.

Each entry is self-contained and fully comprehensible without reference to other work and includes, as much as possible, the name of the person who coined the term (word) and the publication in which it first appeared; provides the original definition of the term and changes in the definition, if applicable; describes how the definition was derived (observation, experimentation, logic, etc.); and indicates the first application of the term in neuropsychopharmacology. Each statement is referenced with the original publication. Comments on entries are restricted to correction of factual information, and queries regarding

how the concept was derived if unclear. Entries are listed in alphabetical order of terms/words. Comments and replies follow the respective entry and are kept open indefinitely.

Project Two (Drugs - Eric Konofal). Historical Drug Inventory of Psychotropic Drugs

A comprehensive collection of drugs with an effect on behavior and mental activity, and/or in use in the pharmacotherapy of psychiatric/neurological disorders; and/or in research in neuropsychopharmacology.

Each entry is self-contained and fully comprehensible without reference to other work and includes information on each step in the development of the product from the discovery/synthesis of the molecule/structure, the starting point in the development of the substance (e.g., phenylisopropylamine for amphetamine, phenothiazine nucleus for chlorpromazine), until the synthesis of the final product. Characterization of the final product (the subject matter of the entry) is restricted to pharmacological actions recorded by behavioral, neurophysiological, and molecular measures, relevant to the therapeutic (verified and/or approved by regulation) and adverse effects of the substance, and/or its use in neuropsychopharmacological research. Each statement is referenced with the original publication. Comments on entries are restricted to correction of, or addition to factual information with reference, and queries regarding how relationship(s) between pharmacological actions and clinical effect were derived. Entries are listed in alphabetical order of drugs identified by their generic names. Comments and replies follow the respective entry and are kept open indefinitely.

CURRENT STATUS:

Bromides by Thomas A. Ban	October 24, 2013
Methylphenidate by Eric Konofal	June 30, 2013
Thyrotropin releasing hormone (TRH) by Andrew Winokur	December 19, 2013

Project Three (Photos – Carlos Morra). Photo History of Neuropsychopharmacology

A *series of photos* of individuals with major contributions to the development of neuropsychopharmacology (macrohistory) presented in chronology from the early 19th century to present. It also includes *individual photos* with one or more person on the photo, and *collection of photos* of individual(s) who contributed to development (microhistory) of the field.

In *individual photos*, each individual on the photo, as well as the time and place the photo was taken, are identified from left to right (clockwise) and row by row. In *collection of photos*, the time and place the photos were taken in the collection are identified as well as the individual(s) on each photo, as in “individual photo(s)”. In (historical) *series of photos* the year of birth and death of individuals on each photo of the series, as well as their contribution(s) to the development of neuropsychopharmacology (with reference to the original publication) is (are) identified. Individual photos, including one individual on the photo or a group, are listed in alphabetical order by the name of the individual on the photo, or in case of group photo by the name of the person at the utmost left of the photo with all other names listed, indented in alphabetical order below. Collection of photos are listed in chronology of events the photos in the collection were taken, ordered as individual photos within the collection. Historical series of photos are listed alphabetically by the name of the authors of the series.

Project Four (Profiles – Carlos Morra). Profiles of Distinguished Neuropsychopharmacologists

Vignettes of individuals who contributed to the development of neuropsychopharmacology, focused on their contributions.

Vignettes are prepared in standardized manner, centered on the individual's contributions to neuropsychopharmacology, with each contribution referenced and contributions presented in chronology. In each vignette presentation of contributions is preceded with minimal biographic information that includes year and place of birth, schooling and work history, and is followed by brief reference to contributions to other fields, major honors, and year and place of death if applicable. Comments on entries are restricted to correction of factual information and to addition of missed contributions. Entries are listed in alphabetical order of distinguished neuropsychopharmacologists. Comments and replies follow the respective entry and are kept open indefinitely.

Project Five (Controversies – Antonio E. Nardi). Controversies in the History of Neuropsychopharmacology

Essays on controversies in the history of neuropsychopharmacology with an impact on the development of the field.

Controversies of the past are presented as overviews with a discussion of its consequences; ongoing controversies are presented either as an impartial exposition of the

controversy or as an argument in support of one side. Entries are listed in alphabetical order of the name of the authors. Comments and replies follow the respective entry and are kept open indefinitely.

Project Six (Textbook – Aitor Castillo). Textbook on the History of Neuropsychopharmacology

A multi-authored, edited text on the history of neuropsychopharmacology for general use by students educators, researchers and clinicians.

Each chapter covers a different area of the field from its inception to present in chronology with information restricted to established knowledge. Entries are listed in order of sequence in table of contents with the name of the author followed by the title of the chapter. Comments and replies follow the respective entry and are kept open indefinitely.

CURRENT STATUS:

Introduction by Peter R. Martin	June 6, 2013
Thomas A. Ban: The birth of neuropsychopharmacology	June 6, 2013
Edward Shorter: Endocrine psychiatry in a historical perspective	July 25, 2013
<i>Comment by Andrew Winokur</i>	Aug. 29, 2013
<i>Comment by Walter Brown</i>	Dec. 26, 2013
<i>Comment by Donald F. Klein</i>	April 9, 2015

Project Seven (Discoveries –George Gardos). Discoveries That Have Not Been Followed Up & Experiments that Could Not Be Replicated

Essays that give full account of either a promising discovery that has not been followed up or of an experiment that could not be replicated with a discussion of possible reasons why the discovery has not been followed up or the experiment replicated.

Entries are listed in alphabetical order of the name of authors.. Comments and replies follow the respective entry and are kept open indefinitely.

George Gardos: Discoveries that have not been followed up and experiments that could not be replicated	August 20, 2015
<i>Comment by Samuel Gershon</i>	November 12, 2015

CURRENT STATUS:

Project Eight (Books – Carlos Morra). Outline of First Hand Accounts and Information on Books in Neuropsychopharmacology: Classics and Currents

First Hand Accounts

Collections of information on the history of neuropsychopharmacology based on presentation of contributions by the contributors themselves in a lecture, autobiographic account or interview. .

Each entry provides full information on the collection including the name of editor(s), title, place of publication, publisher and year of publication. In case of a series the title of each volume, as well as the editor and year of publication of each volume is recorded if different from the editor of the series and/or the year of publication of the series. Reference(s) to published review(s) on collections are listed in alphabetical order of the name of reviewer(s) after the listing of the collection to which they refer. Entries in First Hand Accounts, are listed in chronological order.

Project Nine (Biographies -Barry Blackwell) Biographies, Autobiographies and Selected Writings of Neuropsychopharmacologists

Reviews of autobiographies, biographies and selected or collected writings of individuals involved at least for a period of time during their professional career with neuropsychopharmacology.

Reviews must include material on neuropsychopharmacology or reference to material related to neuropsychopharmacology, but does not have to deal exclusively with information related to neuropsychopharmacology. They are written by the authors/editors of the work reviewed or by a reviewer. The reviews are listed in alphabetical order of the individuals whose autobiography, biography or selected/collected writings are reviewed. Comments and replies follow the respective entry and are kept open indefinitely.

Project Eleven (Archives – Gregers Wegener). Electronic Archives in Neuropsychopharmacology

Collections of unpublished papers and presentations, including power points and slide shows of network members and distinguished neuropsychopharmacologists (See, "Profiles").

Entries in individual collections may be incomplete and related to neuropsychopharmacology only marginally. Each entry is presented with a preamble in which the story of the entry piece is presented in chronology. Collections are presented in alphabetical order of the name of the network member or distinguished neuropsychopharmacologists, and each entry within the collection is listed in alphabetical order of its title. Comments and replies follow the respective entry and are kept open indefinitely.

CURRENT STATUS:

Introduction by Gregers Wegener	July 4, 2013

1957: The year of neuropsychopharmacology

(Power point presentation) Sept. 19, 2013

ACNP's International Archives of Neuropsychopharmacology. From the

beginning to 2007 Aug. 22, 2013

An Introduction to Psychiatric Nosology April 24, 2014

Books: Authored and Edited October 23, 2014

Capsules History of Psychopharmacology

1. Pharmacotherapy in psychiatry in the 19th century July 10, 2014

2. Organic chemistry and the birth of the pharmaceutical industry July 10, 2014

3. Neurpharmacology: Structural basis and conceptual framework July 10, 2014

4. Development of the diagnostic concept of dementia praecox and
early pharmacological treatments of schizophrenia July 17, 2014

5. Model psychosis and exogenous psychosis July 17, 2014

6. Barbiturates and sleep therapy July 17, 2014

7. Neurochemistry and neuronal transmission: early development July 31, 2014

8. Drug regulation in the USA July 31, 2014

9. Pharmacologically induced fever July 31, 2014

10. Definition and scope of psychopharmacology August 7, 2014

11. Pharmacological interventions and treatments introduced in
psychiatry during the 1930s August 7, 2014

12. Causal treatments in the 1930s and '40s and their effect

on the diagnostic distribution of psychiatric population	August 7, 2014
13. From the Nuremberg Code to the Helsinki Declaration	August 7, 2014
14. Introduction of the first set of psychotropic drugs	August 14, 2014
15 Psychiatry in the 1950s	August 14, 2014
16. Synthesis of iproniazid and recognition of its monoamine oxidase inhibiting and euphorizing effects	August 14, 2014
17. Adrenochrome hypothesis of schizophrenia and treatment with nicotinic acid	August 21, 2014
<i>Comment by John Court</i>	November 13, 2014
<i>Reply to John Court's comment by Hector Warnes</i>	December 18, 2014
<i>Reply to John Court's comment by Thomas A. Ban</i>	January 29, 2015
18 Introduction of chlorpromazine in psychiatry	August 28, 2014
19. The spectropotofluorimeter and spectrophotofluorimetric findings with reserpine and iproniazid	September 4, 2014
20. Sedative v. incisive neuroleptics: therapeutic implications	September 11, 2014
21. Therapeutic profile of nerleptics in schizophrenia	September 18, 2014
22. Thioridazine and cardiac conductance changes	September 25, 2014
23. Demonstration of the therapeutic efficacy of neuroleptcs in schizophrenia and the differentiation of the therapeutic effect of neuroleptics from theeffects of on-specific factors,	October 2, 2014
Chlorpromazine after 50 years	Sept. 5, 2013
CINP and its past	Aug. 15, 2013

Project Twelve (E-Books – Peter R. Martin). Educational E-Books

A collection of entries from each project separately with an introductory overview of the material by respective project coordinators (presented with some regularity); and a collection of entries from all projects with an introductory overview by the central

coordinating team (presented annually). in Educational E-Books. In addition, Educational E-Books are presented on special topics related to the history of neuropsychopharmacology..

Educational E-Books are listed in alphabetical order of the name of the author(s)/editor(s); in case of more than one entry by same author/editor in sequence of the date of posting.

APPENDIX

Specifications for preparing submissions for postings:

Word document:

Letter size, Times New Roman letters, 12 font size, 1" margin on left, text justified, 1.5 space between lines, pagination in right upper corner, start each paragraph 5 spaces indented, subheadings on left side of text with regular letters in italics, and sub-subheadings same but with 12 spaces indented.

Tables/figures:

Numbered separately in sequence with each table/figure inserted in text in place it should appear. Labels to tables/figures (Table 1, figure 1) with regular letters centered above table/figure with a 1.5 space between last line of text and label and with a 1.0 space between label and corresponding table/figure. Legends to tables/figures in regular letters centered below corresponding table/figure with a 1.0 space between table/figure and legend, and with a 1.5 space between table/figure and continuation of text.

Title page (only for Educational E-Books):

Has title of the book in capital letters centered in bold in the middle of the page, 14 font size, with name of the author(s)/editor(s) with regular letters 14 font size without professional titles below. International Network for The History of Neuropsychopharmacology centered at the bottom of page, 12 font size letters with the year of posting centered below.

Identification of posting:

In left upper corner with regular letters 10 font size in bold with 1.0 space between lines: 1st line - full name of author/reviewer; 2nd line – project identifier; 3rd line: date of posting. (See sample below).

References:

Are inserted in parenthesis as they occur by name of author(s) and year of publication in alphabetical order; and are listed in alphabetical order under the heading REFERENCES following text with 12 font size letters with a 1.0 space between references. following the prototypes below:

Katz MM, Houston JP, Brannan S, Bowden CL, Berman N, Swann A, Frazer A. A multivantaged behavioral method for measuring onset and sequence of the clinical actions of antidepressants. *International Journal of Neuropsychopharmacology* 2004; 7: 471-9.

Ban TA. *Psychopharmacology for the Aged*. Basel: Karger; 1980. pp. 42-7.
