

Table VIII

PATHOGENESIS	PHASIC COURSE		SHIFT-LIKE COURSE
	Simple-Monopolar Pattern	Multiform-Bipolar Pattern	
Affective	Hypochondriacal agitation	Acute anxious-ecstatic hallucinosis	Episodic hypnotic states
	Hypochondriacal depression		
	Anxious reference psychosis		
	Perplexed strangeness psychosis		
Conative	Expansive confabulations	Akinetic-hyperkinetic motility psychosis	Periodic morbid impulses
Intellectual	Ecstatic inspiration psychosis	Stuporous-agitated confusion	Episodic twilight states
		Acute perplexed interpretation psychosis	

Kleist's (1924) classification of "degeneration psychoses," consisting of disorders which cannot be allotted to one or the other of Kraepelin's two major diagnostic categories. Based on Silveira's (1961) presentation at the Third World Congress of Psychiatry.
