

## APPENDIX B

### Lecture Outlines

We have included a series of model lecture outlines which were readily available to us. Naturally, each individual instructor or lecturer will find facts and areas of emphasis to his liking or disliking. These are suggested "outlines", which are not necessarily intended to provide a rigid curricular set of topics to be covered. Rather, the outlines serve as what we would consider ideal starting blocks, which may be modified to fit the individual clinical teaching situation.

### Contents

Psychopharmacology Overview	B - 3
1. Clinical Pharmacokinetics	B - 14
2. Psychobiology of Schizophrenia	B - 17
3. Psychobiology of Depression	B - 19
Antidepressants	B - 21
1. Tricyclic Antidepressants: A Clinical Update	B - 21
2. Antidepressants: A Clinical Update	B - 38
Lithium	B - 47
1. Lithium: A Clinical Update	B - 47
2. Lithium Maintenance	B - 63
3. Therapeutic Drug Monitoring: Lithium	B - 67

Contents (cond't)

Monoamine Oxidase Inhibitors	B - 88
Anxiolytics	B - 91
1. Anxiolytics: Current Status	B - 91
2. Anxiety Disorders: A Rational Approach to Using the Benzodiazepines	B - 98
3. Antianxiety Drugs: A Clinical Update	B - 102
Antipsychotics	B - 105
1. Antipsychotics: A Clinical Update	B - 105
2. Antipsychotic Agents	B - 107
3. Treatment of the Schizophrenic Patient: Practical Issues	B - 116
4. Clinical Use of Antipsychotic Drugs	B - 124
Stimulants and Depressants	B - 127
Electroconvulsive Therapy	B - 130
Psychopharmacology in the Medically Ill	B - 132
Alcoholism	B - 164
Sleep Disorders	B - 174
1. Sleep Disorders	B - 174
2. Hypnotics: A Clinical Update	B - 181
3. Sedatives and Hypnotics	B - 187
4. Barbiturates and Sedative Hypnotics	B - 189
Pediatric Psychopharmacology	B - 193
Geriatric Psychopharmacology	B - 195
1. Depression in the Elderly: Diagnosis and Psychopharmacologic Considerations	B - 195
2. Psychopharmacology and the Aging Patient	B - 198
Electroconvulsive Therapy	B - 214
