

Johan Schioldann: History of the Introduction of Lithium into  
Medicine and Psychiatry  
Birth of Modern Psychopharmacology 1949

**Contents**

Preface		vii
Acknowledgements		xiii
Introduction		xix
<b>Part I: Birth of lithium therapy 1859</b>		<b>1</b>
Chapter 1	Gout, uric acid, uric acid diathesis & mood disorders	3
Chapter 2	The concepts of recurrent gouty mania, recurrent melancholy & gouty insanity. Auto-intoxication.	7
Chapter 3	Anti-gout remedies: colchicine, alkaline waters & lithium salts	19
Chapter 4	The discovery of lithium	21
Chapter 5	Lithium's entry into materia medica	23
Chapter 6	Carl and Fritz Lange. The theory of periodical depressions & 'the old Danish lithium treatment'	35
Chapter 7	Uric acid diathesis and lithium treatment in Great Britain, the USA, France and Germany—concurrent with, and after, the Lange brothers	71
Chapter 8	Resurrection of Carl Lange's concept of periodical depressions	87
Chapter 9	Concluding remarks on uric acid diathesis and mood disorders & Birth of lithium therapy in 1859	99
<b>Part II: Renaissance of lithium therapy. Birth of modern psychopharmacology 1949</b>		<b>111</b>

Chapter 10	John Cade's 'discovery' of lithium's anti-manic effect	113
Chapter 11	Cade's hypothesis of manic-depressive illness	117
Chapter 12	Cade's experimental animal studies: the search for the toxic factor. The nitrogenous constituents of urine: urea, uric acid and creatinine	121
Chapter 13	Cade's choice of lithium: the relative dissolubility of uric acid. The protective effect of lithium	125
Chapter 14	From guinea pigs to psychotic patients. Cade's 'story of lithium'	129
Chapter 15	Cade's clinical trial of lithium	133
Chapter 16	From serendipity to serenity	137
Chapter 17	Attempts at replicating Cade's observations in guinea pigs	151
Chapter 18	Lithium for medicinal use in Australia before Cade	155
Chapter 19	Did Cade have prior knowledge of 'gouty depression', 'uratic depression', and 'gouty mania' and of their treatment with lithium salts?	159
Chapter 20	Johnson's analysis of Cade's discovery	163
Chapter 21	Reines's analysis of Cade's discovery	167
Chapter 22	Cade's professional biography, publications and (possible) scope of inspirational sources	173
Chapter 23	The lithium toxicity scare	235
Chapter 24	Cade's first lithium patient, W.B.: a paradigm of lithium therapy	237
Chapter 25	Cade's 'abandonment' of lithium therapy. W.B. revisited	245
Chapter 26	Early confirmations of Cade's discovery. Scientific proof by Mogens Schou in 1954	251
Chapter 27	Cade and Schou exchange thanks	261
Chapter 28	Cade's trajectory from auto-intoxication hypothesis to lithium therapy of manic excitement via intoxication studies in guinea pigs	265
Chapter 29	Legacy and significance of Cade's discovery: the 'miracle' of 1948–49. Birth of modern psychopharmacology 1949	273
Chapter 30	The final question: How old is lithium therapy of mood disorders? Lange–Cade: a paradoxical connection?	287

<b>Epilogue</b>	291
Appendix I Carl Lange: On Periodical Depressions and their Pathogenesis	293
Appendix II The many faces of John Cade, by Ann Westmore	309
Appendix III My journey with lithium, by Mogens Schou	313
Person Index	321
Subject Index	337
